Correction to: Cardiovascular Drugs and Therapy
<https://doi.org/10.1007/s10557-022-07409-w>

In the following article published in *Cardiovascular Drugs and Therapy*, December 17, 2022, the subtitle of Table 1 included an incorrect phrase: “For patients receiving

rivaroxaban or for patients receiving apixaban or for patients receiving edoxaban.”

This has been deleted and replaced with the correction sub-heading “For patients receiving dabigatran.”

The original article can be found online at <https://doi.org/10.1007/s10557-022-07409-w>.

Below is Table 1 including this correction.

Table 1 Criteria for defining a patient as requiring a reduced dose of direct oral anticoagulants in the ANATOLIA-AF study

For patients receiving dabigatran

- Age \geq 80 years
- Concomitant usage of verapamil
- \geq 2 of the following criteria: age 75–79 years, GFR 30–50 mL/min/1.73 m², HAS-BLED score \geq 3, concomitant usage of antiplatelet therapy, concomitant usage of amiodarone, or body weight \leq 60 kg

For patients receiving rivaroxaban

- GFR 15–49 mL/min/1.73 m²
- \geq 2 of the following criteria: age \geq 75 years, HAS-BLED score \geq 3, concomitant usage of antiplatelet therapy, concomitant usage of amiodarone, or body weight \leq 60 kg

For patients receiving apixaban

- \geq 2 of the following criteria: age \geq 80 years, serum creatinine \geq 1.5 mg/dL, or body weight \leq 60 kg
- GFR 15–29 mL/min/1.73 m²
- \geq 2 of the following criteria: age \geq 75 years, HAS-BLED score \geq 3, concomitant usage of antiplatelet therapy, concomitant usage of amiodarone, or concomitant usage of diltiazem

For patients receiving edoxaban

- GFR 15–49 mL/min/1.73 m²
- Body weight \leq 60 kg
- Concomitant usage of strong P-glycoprotein inhibitor (e.g., dronedarone, ketoconazole, erythromycin)
- \geq 2 of the following criteria: age \geq 75 years, HAS-BLED score \geq 3, concomitant usage of antiplatelet therapy, concomitant usage of amiodarone, or concomitant usage of verapamil

GFR glomerular filtration rate, *HAS-BLED* uncontrolled hypertension, abnormal renal and liver function (1 point each), stroke, bleeding, labile international normalized ratios, elderly (age > 65 years), drugs or alcohol (1 point each) (concomitant use of antiplatelet agents or non-steroidal anti-inflammatory drugs, alcohol abuse).
